

The Alan Turing Institute

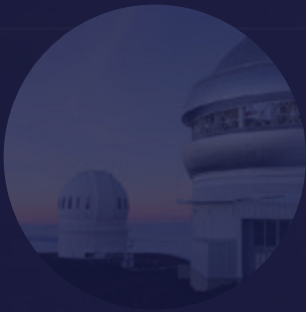

Research programmes **showcase**

The Alan Turing Institute is pleased to invite you to its first Research Programmes Showcase, a new event series connecting the Turing's university partners to its research programmes.

Taking place in the new year, the series will offer the opportunity to learn more about the research ambitions, partners and key projects for each of the Turing's research programmes. The events will provide valuable insight into how you can get involved.

Each session will begin with a presentation and will be followed by a panel discussion via an audience Q & A session. The second half of the event will include a networking session with key members of the programme.

You can find details of all scheduled events below, the public policy programme will be announcing their date shortly. To book your place, click on the image.

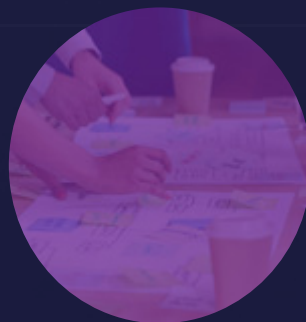

Data science for science

12 January 2021,
