

Presenting the Turing Fellow Research Projects

Presenting the Turing Fellow Research Projects is a new event series taking place across the Institute's university partner network between April – November 2021. The series will take place in two groups: April – June and September – November.

In 2018 over 300 Turing Fellows were appointed at the Institute following an open call. Some of these received additional funding to deliver research projects that have had substantial impact in the areas of data science and artificial intelligence.

The Institute and its university partners are delighted to host the events which will showcase the breadth of research and demonstrate the impact of these research projects. Events will be added to the website over the coming weeks, visit regularly for more information.

[Details of all events can be found here](#)
